Hosni Ali Fahmi El-Qamhawy

Damanhor, Egypt | hosnyali070@gmail.com | github.com/Hosni-000 | LinkedIn

SUMMARY

Junior Backend Developer with hands-on experience across PHP, Laravel, C++, and Python, plus working knowledge of Linux, Docker, networking, and OS fundamentals. Comfortable building projects from scratch without frameworks, reading system-level behavior, and translating business requirements into database and system designs. Seeking a Junior Backend Developer role to apply this foundation in a production environment.

EDUCATION

Facility of Commerce (Business Adminstration) — Damanhor University *(Expected 2027)*

CERTIFICATIONS & COURSES

- Cybersecurity for Beginners — Information Technology Institute (ITI) (Mar 2026)
- Backend Development — Information Technology Institute (ITI)

PROJECTS & CONSULTING

Database & Filtering System Design (Consultant) — Governmental Organization *(Personal Project)*

- Designed an ERD for the organization's data structure and built a filtering method to organize and query records more efficiently.

System Design Consultant — Startup (Freelance) *(Personal Project)*

- Advised on database and system architecture, including ERD design, for a startup's early-stage product.

ASCII Art Converter — NeoVim Tool — Personal Project *(PHP)*

- Built a CLI tool in PHP to convert images into ASCII art for use inside NeoVim workflows.

Personal Blog (Unreleased) — Personal Project *(Pure PHP)*

- Built a blog from scratch in pure PHP without a framework, handling routing and templating manually.

SKILLS

Backend: PHP, Laravel, C++, Python

Systems & DevOps: Docker, Linux, CLI, Networking Fundamentals, Operating Systems

Security: Cybersecurity Fundamentals
